

HARSHAL AHIRE

Full Stack Java Developer

7350552784 @ harshal14ahire@gmail.com linkedin.com/in/ahire-harshal/ github.com/harshal14ahire Pune

SUMMARY

Results-driven **Full Stack Java Developer** with **1.5+ years of hands-on experience** building and scaling enterprise-grade distributed systems. Proven track record in architecting **multi-tenant microservices**, developing high-performance **RESTful and Reactive APIs** using **Spring Boot** and **Spring WebFlux**, and delivering production features end-to-end across **Angular** frontends and **Java** backends. Deep expertise in **Apache Kafka** event-driven architecture, **MongoDB Atlas Search**, **PostgreSQL**, and **Node.js microservices**. Consistently ships features that improve performance, security, and user experience - with a focus on **clean code**, **scalable API design**, and **measurable outcomes**.

EXPERIENCE

Full Stack Java Developer

ILMTEC Solutions

1.5+ Years

02/2025 – Present Pune, India

Enterprise software company delivering B2B SaaS platforms for European markets

- RESTful API Development (Talenlio – ATS Platform):** Designed and developed **high-performance REST APIs** in **Spring Boot** for an enterprise Applicant Tracking System serving the European recruitment market; implemented **load handling**, **security hardening**, and **response time optimization** on every new endpoint, directly improving user interaction and platform reliability
- Backend Notifications System:** Implemented an **event-driven notification system** using **Spring Application Context Events** to trigger real-time alerts for **Job Post**, **Member**, and **Job Application** events — reducing manual intervention and improving candidate engagement
- Angular Frontend Integration:** Integrated backend APIs with **Angular** frontend modules, resolving data inconsistencies, UI bugs, and design mismatches to deliver a seamless end-user experience
- Multi-Tenant Architecture (Cathago – German B2B Procurement):** Engineered a **multi-tenant data isolation system** in **Spring Boot + PostgreSQL** allowing enterprise clients to manage independent accounts within a shared platform — feature received extremely positive feedback from end users at delivery
- Reactive Search API:** Built a full-text **Faceted Search API** using **Spring WebFlux (Mono/Flux)** and **MongoDB Atlas Search** with custom index creation; enabled multi-field search with **\$search operator**, improving application response time by **70%** across talent pool queries of 1M+ records
- Real-Time PDF Microservice (Node.js):** Architected a **Node.js 22 / TypeScript** microservice using raw **Buffer byte streams with zero disk I/O** for runtime PDF generation — supporting Order Request, Order Confirmation, and E-Delivery templates; integrated with **Apache Kafka events** to auto-attach and email PDFs to suppliers on order status changes, and upload documents to **AWS S3**
- Public Customer API + API Documentation:** Developed a dedicated **Public REST API** layer for external customer system integration; authored comprehensive **API documentation** with schemas, request/response examples, and usage guidelines for every endpoint
- AI-Powered Price List Parsing:** Integrated **Spring AI + Google Gemini SDK** to parse uploaded price list files and auto-generate product catalog entries, reducing manual data entry and accelerating onboarding for new suppliers
- Contract Management Feature:** Developed end-to-end **Contract Management APIs** in **Reactive Spring Boot** — enabling file upload, contract parsing, association with price lists, and automatic contract attachment to orders at checkout
- Unit & Integration Testing:** Wrote comprehensive test suites covering **Unit Tests**, **Mapper Tests**, **Service Impl Tests**, **Controller–Service–DAO Integration Tests**, and **End-to-End Tests** using **JUnit** and **Mockito**, ensuring production stability across both Talenlio and Cathago platforms

EDUCATION

MSC Computer Science

Indira College of Commerce and Science

06/2024 – 05/2026 Pune

BSC Computer Science

K.A.A.N.M.S Arts, Commerce & Science College

06/2021 – 06/2024 Satana Nashik

SKILLS

TECHNICAL SKILLS

Java Spring Boot Reactive Spring Boot
Apache Kafka Angular 19 Microservices
REST API Spring WebFlux JPA MongoDB
PostgreSQL Hibernate Docker Kubernetes
JWT OAuth Node.js TypeScript Spring AI
AWS S3 Express.js Angular Material NoSQL
Middleware JUnit Mockito GitLab CI
GitHub Linux

PROJECTS

Cathago

10/2025 – Present Pune

German B2B Procurement Platform

- Enterprise-scale multi-tenant SaaS for the German construction industry — managing purchase orders, supplier catalogs, delivery tracking, PDF workflows, contract management, and AI-powered price list parsing

Talenlio

05/2025 – 09/2025 Pune

Enterprise Recruitment SaaS

- High-scale Applicant Tracking System for the European recruitment market — REST APIs, event-driven notifications, Angular integration, and an **AI-driven resume scoring engine** with MongoDB Atlas Search

KEY ACHIEVEMENTS

Selected for Zonal Level — Aavishkar 2024 Research Competition

Developed a Smart Student Attendance System with geolocation-based validation engine

Best Research Paper Award — National Student Conference, Indira College

Publication on Fraud Detection Using Machine Learning — predictive modeling techniques presented to industry experts
